Make Your Impact

Your Future Starts With Us

Know-How is the Fuel That Keeps OJ Rolling

You have it and we need it!

Innovation and specialized knowledge are fundamental to OJ Electronics' success. At the same time, we have an ambition to constantly renew ourselves, which is why we are always looking for talents who can contribute to the positive development of our company.

Therefore, we offer internships and student jobs within several professional fields.

Below are just some of them:

- ✓ Embedded software development
- ✓ Cloud software development
- ✓ Hardware development
- ✓ Test and QA
- ✓ User interface and user experience design
- ✓ Production technology
- ✓ Sales and marketing

You are more than welcome to send us your motivated application if you are interested in joining one of the world's leading designers and developers of electronic controls for HVAC and underfloor heating systems. As an intern or student, you will experience a great amount of trust and responsibility, and you will be included in genuine projects.

You will be joining a company that is based on the know-how that lies within our employees. Every single one of them. They are the core of our company, which consists of more than 180 passionate professionals who work on improving human comfort and physical environment through electronic solutions.

If you are curious to hear more about the possibilities and have a more in-depth chat, feel free to contact us.

Do you want to join us?

In your application, please highlight your field of study and why you believe this would be a perfect match.

About OJ Electronics

KNOW
HOW
CREATES

Founded in 1964 and headquartered in Sønderborg, Denmark, OJ Electronics produces electronic controls for underfloor heating and HVAC controls and drives. Our products are available through partners and distributors worldwide, and we have subsidiaries and sales offices in key markets, including the United States and Poland. Everywhere, we are known for our innovative approach, insistence on product quality, and deep application knowledge – all of which helps customers differentiate themselves in the market.

In June 2023, OJ Electronics was acquired by BITZER Electronics, a BITZER Group company also headquartered in Sønderborg. This makes OJ Electronics part of the BITZER Group family, which is represented at 75 locations in over 40 countries and employs some 4200 people worldwide.
