THERMOSTATS

Ideal Combination of Form and Function

OJ ELECTRONICS

OJ Microline®

MWD5-Voice thermostat

New variant with voice control makes life even more comfortable and convenient for users.

MWD5-Voice

Type - MWD5-1999-OJC3

- Remote access
- Control via user-friendly app
- Simple setup - installation wizard
- No gateway required
- **Voice control**

works with Google Home

Compatible with **Amazon Alexa**

MWD5-WiFI

Type - MWD5-1999-P3

- Remote access
- Control via user-friendly app
- Simple setup - installation wizard
- No gateway required

Google, Google Home, Google Nest Audio, and Google Nest Mini are trademarks of Google LLC. Nest Audio and Nest Mini require a Wi-Fi network, a nearby electrical outlet, a Google Account, and a compatible mobile device. Minimum OS requirements are available at g.co/home/req. Google Assistant-enabled device required. Google Assistant is not available in certain languages and countries. Amazone Echo, Echo dot and Echo Plus are trademarks of Amazon.com Inc. or its affiliates.

WiFi Controlled Thermostats

Remote control of the OJ Microline® OWD5 via a user-friendly smartphone app offers the ultimate convenience in temperature control. With a contemporary design, unsurpassed flexibility and renowned quality, you are offered a state-of-the-art thermostat with the OJ Microline® OWD5 WiFi for both new installations and for upgrading existing systems.

Unsurpassed User-friendliness and design

The leading OJ Microline® WiFi thermostat is developed to provide an experience second to none for both installers and end users. The integrated guidance ensures trouble-free configuration and daily use. Also, installation and first-time power-up are very easy through a carefully thought out mechanical design.

Touch Thermostats

Having a high-quality control system is important for all floor heating solutions. The OJ Microline® Touch thermostats offer smart control in every word: the touchscreen gives users an attractive, intuitive interface, while installers get thermostats that are easy to install and require no service. As a system integrator, you get technology that matches perfectly the rest of your solution – and won't let you down.

KNOW HOW CREATES

Cutting-edge technology with minimum fuss

The innovative OJ Microline® Touch thermostats are constructed to the high-quality standards you expect from OJ Electronics. System integrators and installers get an adaptable and easy-to-apply solution that matches all their professional and technical needs: full compatibility, minimal field returns and happy end-users.

Premium Clock Thermostats

Our premium range of programmable clock thermostats gives you very easy thermostats to programme, while end-users get energy savings and optimum comfort. This combination of comfort and energy savings is an excellent match for systems with a green/environmentally friendly brand position – and the OJ Microline clock thermostats will match even the strictest quality demands.

6-event settings

Installing and operating our clock thermostats is very easy. A 6-event programme helps make the thermostat even more energy-efficient, while the wheel-based animated navigation menu is intuitive for everyone.

Pre-set schedule saves installation time

The thermostat has a pre-programmed event schedule for easy and economical heating control. The program fits most end-users, so installers won't need to set up schedules from scratch every time.

Basic Thermostats

Our simple floor-heating thermostats are ideal wherever you want basic temperature management – combined with an exceptionally high level of quality that ensures perfectly reliable operation for years and years. These simple comfort thermostats offer features such as a built-in 2-pole interrupter, night setback and max./min. temperature limitation to protect wooden floors against damage.

Fits many frames

Our basic thermostats can be mounted in many different types of frames and light switches, which makes system integration straightforward. They come complete with a floor sensor. Thanks to their IP21 enclosure rating, they are suitable for wet-room installation, too. And their simple, Scandinavian design makes them easy to fit into any interior.

Simple On/Off Thermostats

For some systems – and some customers – what you really want are simple ON/OFF thermostats. These ON/OFF thermostats have proven their worth for years, giving reliable service to those who want the most straightforward kind of control. Here, users know exactly what they get at all times: they simply set the desired temperature on the knob – and, depending on the model chosen, switch the heat on or off on the switch. Pure simplicity that many still appreciate.

Fits many frames

Our simple ON/OFF thermostats can be mounted in many different types of frames and light switches, making system integration straightforward.

Proven, trouble-free technology

Using well-tested, proven technology has obvious benefits for system designers: you will get very low field return rates with this basic on/off thermostat. And the solution makes immediate sense to installers and end-users alike.

DIN-Rail Thermostats

Our DIN-rail thermostats are universal thermostats that can be used in almost any situation: floor heating control, saunas, frost protection of pipes and cooling applications. These DIN-rail relays are solidly made and based on proven technology for years of trouble-free service. And, of course, they allow you to fit everything neatly onto DIN-rails in electrical enclosures, cabinets and so on.

All-in-one thermostat ETN4

Programmable DIN rail thermostat with display. It can handle two sensors. Excellent for heating, saunas, frost protection and more.

Simple thermostat ETV

Very simple DIN rail thermostat: just set the temperature at your chosen setpoint from 0 to 40 degrees.

Frost protection thermostat – ETI

The ETI is similar to the ETV, but this simple DIN rail thermostat also handles temperatures below 0 degrees Celsius. Ideal for frost protection of pipes, etc.

KNOW HOW CREATES

Sensors

We offer a wide range of sensors for various purposes, including floor and room sensors for electrical floor heating and ground, gutter and outdoor temperature sensors for ice and snow melting.

KNOW HOW CREATES

Pick the wire type you need

Our sensors come in many different forms to suit different settings: stiff or flexible wires, flat wires, etc. This ensures that our clients can cater to many different applications and markets.

	Product type	Product features / Technical data	EAN-number
	ETF-144/99A	Floor sensor with stiff wire • NTC, 12kΩ / 25°C • 3m	5703866101069
	ETF-144/99A-10M	Floor sensor with stiff wire • NTC, 12kΩ / 25°C • 10m	5703502908793
	ETF-144/99B	Floor sensor with flexible wire • NTC, 12kΩ / 25°C • 3m	5703502500508
	ETF-144/99T	Thin floor sensor • NTC, 12kΩ / 25°C • 3m	5703502690490
	ETF-144/99T-10M	Thin floor sensor • NTC, 12kΩ / 25°C • 10m	5703502901763
	ETF-944/99-H	Remote room sensor • NTC, 12kΩ / 25°C	5703502500379
	MTC-VH2	Installation box for wall mounting • For thermostats with squared frames	5703502690100

© 2024 OJ Electronics A/S

Accessories

We offer a wide range of covers and frames that can be fully integrated with our electric thermostats. That way, your clients can get exactly the look and feel they want for their thermostat interfaces. The accessories are available in many designs and colours.

Our frames fit all thermostat rear housings with the dimensions 55x55mm.

Square design

The square front covers from OJ Electronics fit all OJ thermostats in square design and can be combined with all square OJ frames as well as frames from other companies like Gira.

Round design

The ETI is similar to the ETV, but this simple DIN rail thermostat also handles temperatures below 0 degrees Celsius. Ideal for frost protection of pipes, etc.

Services

To complement the extensive program of high-quality and technologic leading OJ Microline® thermostats, a wide range of services is offered.

Various options are offered to help you tailor the OJ Microline® thermostat to meet the specific requirements of your market strategy through branding and customization of the thermostats.

Additional a carefully designed service program is offered to meet market expectations on data security and operational reliability of cloud-connected thermostats. Due attention is paid to all aspects of the operational safeguarding end-users privacy when it comes to protecting personal data and securing operational reliability of any complex heat control solution built around an OJ Microline® thermostat. OJ Microline® is the obvious choice when it comes to integrating your electric floor heating into your SmartHome system.

Winterline®

We have used our extensive experience with thermostats and sensors to develop a range of ice and snow melting systems that will keep pipes, driveways, roofs etc. safe during even the harshest winters.

Save energy with intelligent sensing

Our ice and snow melting system will set in only when the outdoor temperature drops below the selected setting, and the sensors actually detect snow or ice. This way your system only uses energy when it is needed.

Can handle two zones simultaneously

The system can handle two systems at the same time. For example, you can use them to ensure efficient melting in gutters and a park area at the same time. The system can be used both with electric and hydronic systems, giving all system designers maximum flexibility.

KNOW HOW CREATES

	Product type	Product features / Technical data	EAN-number

OJ Microline®

MCD3 Thermostat

The MCD3 is designed to meet the highest standards for energy efficiency – the European Ecodesign Directive

MCD3: Worry-free thermostat for electric underfloor heating

The MCD3 is a full-featured digital thermostat designed to the highest standards for control of electric underfloor heating.

Meeting all requirements of the European Ecodesign Directive, the MCD3 helps lower the environmental impact by eliminating power wastage.

Its flexible features will ensure keeping the indoor temperature warm and comfortable regardless of different climates and individual needs.

The MCD3 benefits from the User-Centered Design approach of OJ Electronics. This grants you effortless handling during both installation and daily use.

- Highest rating according to the European Ecodesign Directive
- Possible to integrate with external control
- Contemporary design, compatible with standard wall sockets and available in several colours
- Intuitive userinterface for trouble-free programming and daily use
- Recommended for both tile and wooden floors
