

# Google Assistant

## – how to connect

Before setting up voice control for the thermostat, you need a Google account that has been connected to the Google Home app.

1. Open the Google Home app on your smartphone or tablet.
2. At the top left, tap "Add" (+) - "Set up device" - "Works with Google".
3. Select the manufacturer of the device from the list. Search "UWG4" and select "UWG4 Smart Thermostat".
4. Follow the in-app steps to complete setup:
  - a. Sign into the UWG4 app with your login information.
  - b. Read and accept the grants page.
  - c. Your thermostat should now appear as available to be linked to Google Home.
  - d. Choose the thermostat and click "Next" in the bottom right corner.
  - e. Select a location for your thermostat and click "Next".

Your thermostat is now set up and you can try different voice commands using the thermostat name that you chose in the Google Home app.

### Voice command examples:

- ✔ "Ok Google, set the temperature to 70 degrees"

# Amazon Alexa

## – how to connect

Requirements for setup: An Amazon account connected to the Amazon Alexa app and an account for your thermostat.

1. Open your thermostat app on your smartphone / tablet and go to Settings -> My account.
2. Click on Alexa to start linking your thermostat account and Alexa account.
3. Click Open Alexa in the screen that shows the required Alexa skill -> More -> Skills -> Search "UWG4" and select UWG4 Microline.
4. Press ENABLE TO USE – you will now be transferred to the login page for your thermostat.

If you have already linked your Alexa and thermostat account, ENABLE TO USE will not be displayed.
5. Use your login information for the UWG4 MICROLINE application. Once you have entered your account, Alexa will ask for permission. Press YES – ALLOW.
6. When Alexa has created a link to the UWG4 MICROLINE application, press CLOSE and complete the guide.

Your thermostat is now connected to the Amazon Alexa system!

### Voice command examples:

- ✔ "Alexa, what's the temperature in the bathroom"
