OJ Electronics information about EU Regulation 1907/2006

OJ Electronics supports the objectives of EU Regulation (EC) No 1907/2006, REACH (Registration, Evaluation and Authorisation of Chemicals).

OJ Electronics accepts the duty to communicate information on substances in articles according to the requirements in REACH Article 33. OJ Electronics monitors components for REACH status and content of Substances of Very High Concern (SVHC) and works with suppliers in gathering information

Some OJ Electronics products may contain components with SVHC in concentration above 0,1 %. Concerned substance is mainly lead, as lead in a concentration above 0,1 % is still for some types of components a necessity to provide efficient components. OJ Electronics monitors the composition of components brought to market and updates products when improved technology is available.

OJ Electronics is in the process of registering relevant products as required in the EU Waste Framework Directive (EU) 2018/851

For further information on specific products, please contact

Karin Schmidt, QHSE Coordinator
