Information on Conflict Minerals, Cobalt and Mica

OJ Electronics A/S is committed to ensure that minerals contained in our products are sourced with due respect for human rights, the need to avoid contributing to conflict and the desire to support development through our supply chain practices.

The so-called Conflict Minerals (Tantalum, Tin, Tungsten and Gold) pose a specific challenge, as mentioned, inter alia, in the U.S. Dodd-Frank Act, section 1502 and Regulation (EU) 2017/821.

It has come to our attention that also Cobalt and Mica pose a challenge. Even though there are no legal regulations yet, we include these minerals in our efforts on responsible sourcing.

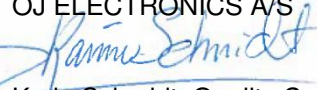

We aim to avoid that any of these minerals used in our products are sourced in a way that finances conflicts anywhere in the world.

We do not source any of these minerals directly. Therefor our efforts are concentrated on ensuring that our suppliers are committed as we are.

We have traced smelters back in our supply chain and can provide our customers with a completed Conflict Minerals Reporting Template, CMRT and Extended Minerals Reporting Template, EMRT, upon request.

For further information and CMRT/EMRT, please contact:

Karin Schmidt, QHSE Coordinator
kas@ojelectronics.com

Best regards
OJ ELECTRONICS A/S
